

Frontier Barnboard Flooring

Product Description

Frontier Barnboard Flooring is one of our more daring flooring products. Authentic barn wood is remanufactured to retain as much of the sawn and original weathered surface as possible while retaining the natural beauty and character of the wood. While barn wood is normally gray to light brown in color, a Frontier Barnboard Floor once finished usually darkens to a warm brown glow with mixed colors from tan to gray. This bold product offers another striking appearance to complete a magnificent home.

- ◆ Specifications are designed to create an overall appearance of a floor and do not always apply to each individual board.
- ◆ Specie-Any specie, usually pine, fir or hemlock.
- ◆ Source-Barn siding and other weathered wood.
- ◆ Moisture-Dried to less than 8% mc.
- ◆ Knots-Unlimited sound knots, some open knots.
- ◆ Holes-Random nail holes often with ferrous stain, bolt holes up to 3/4" diameter allowed.
- ◆ Checks-Unlimited checks and cracks allowed; this product may have more through checks and cracks than most reclaimed floors. These checks and cracks are intended to be part of a finished floor.
- ◆ Surface-Most of the surface area will have original saw-marks or weathering. Some evidence of previous use such as weathered dents and scratches may be visible. Some paint may remain on the surface (due to the age of the wood, any paint is assumed to contain lead and should be handled accordingly).
- ◆ Grain-Mixed grain patterns.
- ◆ Color-Unlimited color variations, usually in brown and gray tones.
- ◆ Millwork-Flooring, Tongue & Groove, back relief, square ends.
- ◆ Special-This product is very rustic and follows the original condition of the wood. There may be variances in thickness within individual boards and from board to board. Some of the original cupping or crowning of boards may continue through the manufacturing process.
- ◆ Sizes-5/8" thick, 3, 4, 5, 6, 7, 8, 9, 10" wide, 1-1/2' - 12' long. Occasionally, thicknesses and widths must be adjusted to accommodate raw product.

The unique distinctiveness of a reclaimed wood floor is generally what makes it so desirable. A sample, photograph or description of a particular type of wood flooring may demonstrate the general characteristics. The sample, photograph or description may not necessarily be representative of the product actually delivered due to the great variability in color, grain, texture, sign of previous use, etc.
